Decrease in Building Usage: Change of Use:

*** May require a soil test pit and profile evaluation to determine whether the existing private sewage system is in an area having a high water table or bedrock condition. Assuring proper siting and installation of private sewage systems will help prevent contamination of groundwater. If the soil profile evaluation shows that the private sewage system is installed in unsuitable soils, it is understood that a code complying private sewage system shall be ordered installed regardless of whether a building permit is issued.**

Private sewage systems that are “failing” by discharging sewage to the ground surface or backing up into the building will be ordered replaced with a code complying private sewage system.

By signing this form, I state that I am the property owner; I have read the above statement and agree to its conditions. I also give permission for a Waukesha County representative to enter my property to determine that the proposed improvement complies with Comm. 83, Wisconsin Administrative Code and Waukesha County Sanitary Ordinance.
