**Proposal**

Peter Lalonde, Preferred Concepts LLC, agent for the Buzdum Trust, property owner, is requesting Site Plan approval for a 1,055 sqft enclosed patio expansion to the Buzdum's Pub & Grill building located at W188 N10515 Fawn Lane.

As presented in the site development and building plans, the proposed patio expansion includes the following features:

- 1,055 sqft concrete pavement addition (west/rear elevation)
  - 118 sqft smoker lounge
  - 487 sqft covered seating
  - 242 sqft cooler equipment area
  - 208 sqft uncovered patio
- Smoker lounge & covered patio to be enclosed w/ vertical corrugated metal wall panels (brown) three (3) aluminum-framed glass panel overhead garage style doors, and metal roofing (brown)
- 60" wide asphalt sidewalk (along south side of building)

Specifications for the garage doors and color chips for the metal wall panels are provided.

**Landscaping & Lighting**

No changes to the existing landscape are proposed. No exterior lighting will be installed.

**Parking, Access & traffic Circulation**

Access is provided to/from Fawn Lane that abuts the existing paved parking lot on the east side of the building with space for approximately 35 vehicles (poorly marked). No additional parking stalls are proposed at this time.

**Storm Water Management**

Between the proposed building and parking lot expansion impervious area will increase by 1,055 sqft. While no calculations are provided for the overall 4.97 acre parcel, a majority of the site is undeveloped and open space. The additional pavement does not meet storm water management requirements; however, the Village Engineer is requiring that a post-construction grading plan be provided to ensure positive drainage is achieved.

**Utilities**

The site is served by a private well and 6,000 gal sanitary holding tank. The Washington County Land Resources Division that oversees permitting for all on-site sanitary systems in Germantown has indicated that the existing holding tank is sufficient but suggests that further evaluation may be necessary depending on additional seating capacity provided by the patio expansion.

**Staff Comment****Planning & Zoning**

This 4.97-acre parcel is located in a B-3: General Business District. The B-3 District was assigned to already developed commercial properties that didn't/couldn't meet the other B-1 or B-2 Business District regulations at the time the current Zoning Code was initially adopted (1981). Arguably, the B-3 District was created to accommodate pre-existing properties that would have otherwise become "non-conforming" if assigned to another business district. For this reason, the B-3 District has very liberal use restrictions and bulk requirements, e.g. setbacks, so that the pre-existing uses and structures could continue to be used and expanded without the restrictions of being a "non-conforming" property. This property was developed prior to 1963 with some type of commercial retail or office use as far back as the 1970's and before the Maple Road/US41 overpass was constructed. The building has been used as a bar/restaurant (1<sup>st</sup> floor) and office space (2<sup>nd</sup> floor) for the last 15+ years under various operators.

This property was classified in the former 2020 Land Use Plan as "Commercial"; more so out of recognition of the pre-existing business use than in anticipation of it being redeveloped as part of a larger commercial area or corridor as is the case along Mequon and County Line Road. Under the new 2050 Plan, this property lies within the new "Schoen Laufen-Menomonee River District". Under the 2050 Plan, the existing business use of the property would be allowed to continue with expansion considered on a case-by-case basis.

Work on the patio expansion was started this past summer with the concrete already poured and refrigerator equipment area roof already installed. The existing covered patio shown on Sheet A1.0 was also installed without permits or approvals. For these reasons, staff is recommending the "double fee" penalty for beginning construction without permits or approvals be assessed and paid prior to issuance of any building permits. Review of the adequacy of the existing patio enclosure for commercial building code compliance will be conducted as part of the commercial plan review required.

**Fire Department/Police Department**

The Fire Department is requiring a pre-occupancy inspection and will need to establish a maximum seating capacity (if applicable).

**Utilities**

The Washington County Land Resources Division that is responsible for on-site sanitary system permitting indicates in a December 1, 2022 permit review report that the existing holding tank size appears to be sufficient but suggests that further evaluation may be necessary depending on additional seating capacity provided by the patio expansion.

**Building Inspection Services**

Building Inspection services has indicated that commercial plan approval of detailed construction plans will be required prior to issuing a building permit along with the required occupancy bond (that may be reduced from \$20,000 to \$5,000 due to the minor addition proposed).

Public Works Department/Village Engineer/Village Surveyor

The Public Works Department has recommended a few minor plan revisions set forth in an October 20, 2022 review memo from the Director of Public Works (copy attached), including a post-construction grading plan be provided to ensure positive drainage is achieved. These plan corrections will need to be addressed in a revised plan set or supplemental information submitted for review and approval prior to issuance of a building permit.

**VILLAGE STAFF RECOMMENDATION**

**APPROVE** the site development & building plans for a 1,055 sqft enclosed patio expansion to the Buzdum's Pub & Grill building located at W188 N10515 Fawn Lane subject to the following (10) conditions:

1. This approval is subject to all the conditions and requirements set forth herein and adopted by the Plan Commission. Approval is granted for the following plans unless superseded by subsequent plan sheets approved by the Village Planner or Engineer pursuant to revisions required herein and/or by the Plan Commission:
  - a. Architectural plan set revised November 29, 2022
2. All plan corrections required by the Public Works Director in the October 20, 2022 review memo shall be addressed and reflected in revised plans and/or supplemental information reviewed and approved by the Village Engineer prior to issuance of a building permit.
3. Commercial building plan approval and submittal of a \$5,000 occupancy bond are required by Inspection Services prior to the issuance of building and occupancy permits. The Village of Germantown is an authorized delegated agent of DSPS to provide all commercial plan review and inspection services through SAFEBuilt of WI and the Village of Germantown.
4. All site plan approval and building permit fees shall be double and paid in advance of issuing any building permits.
5. A pre-occupancy inspection of the enclosed patio area shall be conducted by the Fire Department in cooperation with the final inspection required by Inspection Services. A maximum building capacity shall be determined by the Fire Department if not already determined through the commercial plan review approval.

### **Items Reviewed:**

1. Site Plan Dated: 09-01-22

### **General Comments:**

1. Please respond to each item below. **A written response addressing each item shall be included in your submittal.**
2. The submitted plans have been reviewed for general conformance with State and Village design guidelines. Additional comments could arise as a result of the plan completion and modifications. The items listed below will need to be fully resolved before the Engineering Dept. can recommend a formal approval of the plans and permit for construction.
3. As-builts prepared to Village standards shall be prepared and provided to the Village post-construction (for all applicable items).
4. A professional engineer's original seal is to be affixed, signed and dated on the final set of construction plans.
5. As a guide to the review response: Items in *italics* are resolved or acknowledged, items in regular font are to be addressed yet, items in **Bold** are additional feedback to remaining original comment.
6. Provide a site survey with topography prepared by a licensed land surveyor.
7. Provide a dimensioned site and grading plan prepared by a licensed professional engineer.
8. It appears the septic system for the building will be located on Lot 2. Provide information on how sewage for lot 1 will be managed.
9. It appears the parking lot may have to be reconfigured for the access to the storage buildings. Provide a dimensioned site plan showing how the parking lot will be configured.

We are looking to do the follow work at Buzdums Bar and Grill. Add 6 feet to the existing covered patio, add three glass garage doors and sheet the outer walls with corrugated metal. We also want to add a smoking room off the covered patio and cover the outside coolers with a roof. This work with make the North side of the building look more aesthetically pleasing.
